

SEVENS

Blockchain based Voting Platform (Consensoriented Oracel)

The rating of crowdsourced information plays a key role in the value chains and is becoming ever more important in every industry. SEVENS is the decentralized monitoring authority that uses swarm intelligence and a blockchain to verify statements.

7s.org is the first platform that rates crowdsourced information, such as news, events, videos, statements, contracts and insurances, and saves it in a decentralized blockchain.

The 7s platform also enables users to uncover „fake news“, discuss it on the basis of votes, spread their own opinions without censorship and emotionally reassess information.

This information can then be evaluated in a way that produces meaningful and useful results.

Oraclers can earn 7s (coins) by voting or by buying those.

Why 7s?

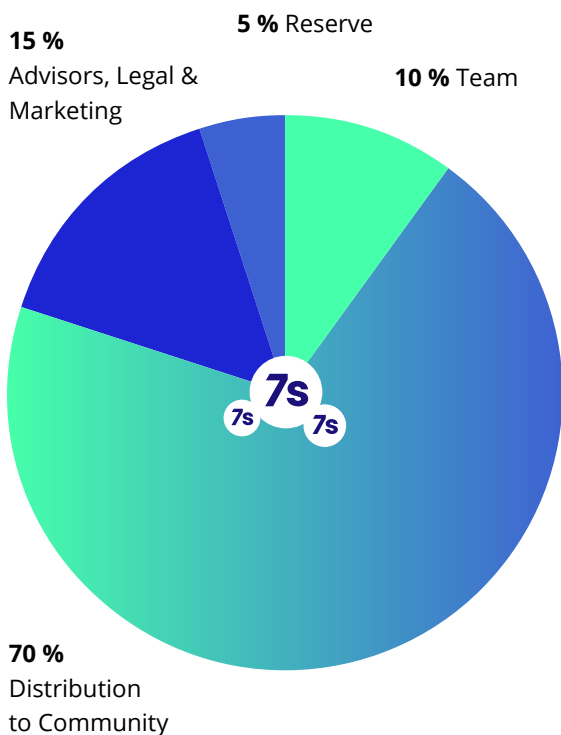

- ✓ 7s gets users out of their social bubble and let them discuss and coordinate about all kind of informations
- ✓ Make public opinions and earn 7s Coins
- ✓ Oracle for e.g. insurances and industry
- ✓ Targeted surveys for companies
- ✓ Traffic generator
- ✓ More influence for influencers
- ✓ Transparency, tamper-proof and traceable thanks to blockchain technology

**WE ARE
ORACLER**
7s.org

Token Sale

During the initial coin offering, the SEVENS tokens are given out. It is possible to purchase the tokens from our ICO page throughout the entire development period using ETH and BTC.

Click dummy / 7s Beta

In the click dummy and, soon, on the beta platform at 7s.org, oraclers can already rate news items and earn 7s rewards (which will then become 7s tokens on the beta platform)

7s.org

Key information

ICO-Launch:

Q4 2018

ICO-End:

Q4 2020

Launch of the official platform:

Q4 2020

Total Tokens:

4,777,777,777 zu ~ 0.02-0.05 Cent
